

Cambium Network Health Checkup Promotion

Cambium Networks has recently introduced a variety of advisory services. These services are new to our customer base. In order to promote the new health check service a trial is being offered at a **50% discount**

Promotion Start Date: January 22, 2018

Promotion End Date: March 31, 2018

Network Health Check is an Advisory Service to assist network operators with identifying and resolving common network challenges. Many network problems worsen very gradually over time and go unnoticed. Network misconfigurations can produce latent problems that disrupt suddenly. The Network Health Check is an evaluation with recommendations of three major technical elements: Radio Configuration, Network Configuration, and Security. This service is available for customers using PMP 100, PMP 430, and PMP 450.

Eligible FCC Part Numbers:

When an End Customer purchases a PMP 450m Limited AP (at standard MDP), they can get an entitlement key for the upgrade to full MU-MIMO functionality for Free.

| MFP PN: | Description |
|----------------|---|
